116 Molecular Assembly of Proteins and Conjugated Polymers: Toward Development of Biosensors
M. S. Ayyagari, R. Pande, S. Kamtekar, H. Gao, K. A. Marx, J. Kumar, S. K. Tripathy, J. A. Akkara, and D. L. Kaplan

122 On-Line Calibration of a Computerized Biosensor System for Continuous Measurements of Glucose and Lactate
M. Kyröläinen, H. Håkanson, and B. Mattiasson

129 Influence of Water Activity on the Synthesis of Triolein Catalyzed by Immobilized *Mucor miehei* Lipase
Y. Dudal and R. Lortie

135 Real-Time Fuzzy-Knowledge-Based Control of Baker's Yeast Production
T. Siimes, P. Linko, C. von Numers, M. Nakajima, and I. Endo

144 Serum-Free Cell Culture on Insulin-Immobilized Porous Collagen Beads
Y. Ito, J. Zheng, and Y. Imanishi

149 Buffer Exchange Using Size Exclusion Chromatography, Countercurrent Dialysis, and Tangential Flow Filteration: Models, Development, and Industrial Application
R. T. Kurnik, A. W. Yu, G. S. Blank, A. R. Burton, D. Smith, A. M. Athalye, and R. van Reis

158 A Mathematical Model for the Leukocyte Filtration Process
A. Bruil, T. Beugeling, and Jan Feijen

165 A Study of Mass Transfer in Yeast in a Pulsed Baffled Bioreactor
X. Ni, S. Gao, and D. W. Pritchard

176 Cultivation of Hybridoma Cells in an Inclined Bioreactor
G. Z. Lu, B. G. Thompson, M. R. Suresh, and M. R. Gray

February 5, 1995

187 Surfactant-Modified Lipase for the Catalysis of the Interesterification of Triglycerides and Fatty Acids
S. Basheer, K.-I. Mogi, and M. Nakajima

196 Characterization of Tryptic Casein Phosphopeptides Prepared Under Industrially Relevant Conditions
N. J. Adamson and E. C. Reynolds

205 Purification of Monoclonal Antibodies from Whole Hybridoma Fermentation Broth by Fluidized Bed Adsorption
J. Thömmes, M. Halfar, S. Lenz, and M.-R. Kula

212 Effects of Calcium on Development of Anaerobic Acidogenic Biofilms
J. Huang and K. L. Pinder

219 Modeling of Anaerobic Formate Kinetics in Mixed Biofilm Culture Using Dynamic Membrane Mass Spectrometric Measurement
P. Dornseiffer, B. Meyer, and E. Heinzle

229 Batch Cultivation of *Methylosinus trichosporium* OB3b: IV. Production of Hydrogen-Driven Soluble or Particulate Methane Monooxygenase Activity
N. N. Shah, M. L. Hanna, K. J. Jackson, and R. T. Taylor

239 Effect of Surfactant and Particle Size Reduction on Hydrolysis of Deinking Sludge and Nonrecyclable Newsprint
S. J. B. Duff, J. W. Moritz, and T. E. Casavant

245 High Cell Density Fermentation of Recombinant *Vibrio cholerae* for the Production of B Subunit of *Escherichia coli* Enterotoxin
A. K. Panda, A. Ghorpade, A. Mukhopadhyay, G. P. Talwar, and L. C. Garg

251 Photolithotrophic Cultivation of *Laminaria saccharina* Gametophyte Cells in a Stirred-Tank Bioreactor
H. Qi and G. L. Rorrer

261 Enzyme Catalyzed Biotransformations in Aqueous Two-Phase Systems with Precipitated Substrate and/or Product
V. Kasche and B. Galunsky

268 Production of Poly(D-3-Hydroxybutyrate) from CO_2, H_2, and O_2 by High Cell Density Autotrophic Cultivation of *Alcaligenes eutrophus*
K. Tanaka, A. Ishizaki, T. Kanamaru, and T. Kawano

Communications to the Editor

276 Enzymic Peptide Synthesis in Microaqueous Solvent-Free Systems
P. Kuhl, U. Eichhorn, and H.-D. Jakubke

279 Kinetics of Nitrate Inhibition of Carbon Tetrachloride Transformation by a Denitrifying Consortia
R. S. Skeen, N. B. Valentine, B. S. Hooker, and J. N. Petersen

February 20, 1995

285 Microbial Production of (+)-*Trans*-Isochorismic Acid
K. Schmidt and E. Leistner

292 Intracellular Flux Analysis in Hybridomas Using Mass Balances and In Vitro ^{13}C NMR
C. Zupke and G. Stephanopoulos

304 Removal of Phenols and Aromatic Amines from Wastewater by a Combination Treatment with Tyrosinase and a Coagulant
S. Wada, H. Ichikawa, and K. Tatsumi

310 Development of Optimized Transfectoma Cell Lines for Production of Chimeric Antibodies in Hollow Fiber Cell Culture Systems
B. S. Schläpfer, M. Scheibler, A.-P. Holtorf, H. V. Nguyen, and G. Pluschke

320 Operational Patterns Affecting Lactic Acid Production in Ultrafiltration Cell Recycle Bioreactor
A. M. R. B. Xavier, L. M. D. Gonçalves, J. L. Moreira, and M. J. T. Carrondo

328 Evaluation of Cellulase Recycling Strategies for the Hydrolysis of Lignocellulosic Substrates
D. Lee, A. H. C. Yu, and J. N. Saddler

337 Dielectrophoretic Separation of Cells: Continuous Separation
G. H. Markx and R. Pethig

344 Esterification Reactions Catalyzed by *Chromobacterium viscosum* Lipase in CTAB-Based Microemulsion Systems
G. D. Rees and B. H. Robinson

356 Kinetics of Ethanol Production by Recombinant *Escherichia coli* KO11
L. Olsson, B. Hahn-Hägerdal, and G. Zacchi

366 Development of Effective Modified Cellulase for Cellulose Hydrolysis Process
J. W. Park and T. Kajiuchi

Communication to the Editor

374 Preferential Release of One Daughter Cell During Division of Immobilized Chinese Hamster Ovary Cells
C. E. Helmstetter

March 5, 1995

379 A Novel Recycle Batch Immobilized Cell Bioreactor for Propionate Production from Whey Lactose
S.-T. Yang, Y. Huang, and G. Hong

387 Working at Controlled Water Activity in a Continuous Process: The Gas/Solid System as a Solution
S. Lamare and M. D. Legoy

398 Performance of a Full-Scale Novel Multiplate Anaerobic Reactor Treating Cheese Whey Effluent
S. R. Guiot, B. Safi, J. C. Frigon, P. Mercier, C. Mulligan, R. Tremblay, and R. Samson

406 Effects of Sorbitol Addition on the Action of Free and Immobilized Hydrolytic Enzymes in Organic Media
A. Öste Triantafyllou, E. Wehtje, P. Adlercreutz and B. Mattiasson

415 Fluid Shear Effects on Suspension Cultures of *Morinda citrifolia*
P. M. Kieran, H. J. O'Donnell, D. M. Malone, and P. F. MacLoughlin

426 Controlling Enzyme-Catalyzed Regioselectivity in Sugar Ester Synthesis
J. O. Rich, B. A. Bedell, and J. S. Dordick

435 Relation Between Dissolved Oxygen Concentration and the Ajmalicine Production Rate in High-Density Cultures of *Catharanthus roseus*
J. E. Schlatmann, J. L. Vinke, H. J. G. ten Hoopen, and J. J. Heijnen

440 Transformation Capacities of Chlorinated Organics by Mixed Cultures Enriched on Methane, Propane, Toluene, or Phenol
H.-L. Chang and L. Alvarez-Cohen

Communications to the Editor

450 Enhancing Effect of Albumin Hydrolysate on Ethanol Production Employing *Saccharomyces sake*
C. S. Shin, J. Y. Song, O. H. Ryu, and S. S. Wang

454 Diffusion of Cu^{2+} in Calcium Alginate Gel Beads: Further Analyses
R. F. Chaiken

458 Metal Recognition by In-Vitro Selection
K. Gupta and John Yin

March 20, 1995

463 Death Mechanisms of Animal Cells in Conditions of Intensive Agitation
M. Al-Rubeai, R. P. Singh, M. H. Goldman, and A. N. Emery

473 The Protective Effect of Specific Medium Additives with Respect to Bubble Rupture
D. Chattopadhyay, J. F. Rathman, and J. J. Chalmers

481 Dynamics of Biofilm Detachment in Biofilm Airlift Suspension Reactors
L. Tijhuis, M. C. M. van Loosdrecht, and J. J. Heijnen

488 Amplification of Toluene Dioxygenase Genes in a Hybrid *Pseudomonas* Strain to Enhance the Biodegradation of Benzene, Toluene, and *p*-Xylene Mixture
J.-Y. Lee, K.-H. Jung, and H.-S. Kim

495 Evaluation and Applications of Optical Cell Density Probes in Mammalian Cell Bioreactors
P. Wu, S. S. Ozturk, J. D. Blackie, J. C. Thrift, C. Figueroa, and D. Naveh

503 Quantitative Analysis of Biofilm Thickness Variability
R. Murga, P. S. Stewart, and D. Daly

511 Continuously Coupled Transcription-Translation System for the Production of Rice Cytoplasmic Aldolase
E. E. Tulin, K. Tsutsumi, and S. Ejiri

517 Aqueous Extraction of Sugarcane Bagasse Hemicellulose and Production of Xylose Syrup
M. Saska and E. Ozer

524 Determination of the Respiration Quotient in Mammalian Cell Culture in Bicarbonate Buffered Media
H. P. J. Bonarius, C. D. de Gooijer, J. Tramper, and G. Schmid

Communication to the Editor

536 Mass Balancing Kinetic Resolution: Calculating Yield and Enantiomeric Excess Using Chiral Balance
A. J. J. Straathof, J. L. L. Rakels, and J. J. Heijnen

539 Index to Volume 45
